SUBJECT INDEX TO VOLUME 106

Thermal and fluid design

Examination of the destructive forces in the Chernobyl accident based on NSRR experiments, M. Sobajima and T. Fujishiro 106 (1988) 179
An analytical model for dynamics of a sodium/water reaction bubble in an LMFBR steam generator and the coupled response of the intermediate heat transport system, Y.W. Shin, A.H. Wiedermann, T.V. Eichler, C.K. Youngdahl and C.E. Ockert 106 (1988) 221
Turbulent flow and heat transfer in rod-bundle subchannels, A.K. Mohanty and K.M. Sahoo 106 (1988) 327

Heat conduction and transfer

Analytical solution for the transient thermal response of volumetrically heated fixed porous nuclear debris beds, G.E. Mueller 106 (1988) 231

Fluid dynamics

Measurement of secondary flow vortices in a rod bundle, V. Vonka 106 (1988) 191
Turbulent transports by secondary flow vortices in a rod bundle, V. Vonka 106 (1988) 209

Engineering mechanics

Measurement of Mode III fracture energy of concrete, Z.P. Bazant and P.C. Prat 106 (1988) 1
Multi-scattering and boundary effects in soil-structure interaction, H.S. Chang and T. Belytschko 106 (1988) 9
Seismic analysis of LMR reactor tanks, Y.W. Chang, D.C. Ma, J. Gvildys and W.K. Liu 106 (1988) 19
Failure pressure and failure mode of the bolted connection for the large component port in German PWR containments, B. Göller, R. Krieg, G. Messemer and E. Wolf 106 (1988) 35
NEPTUNE: a system of finite element programs for three-dimensional nonlinear analysis, R.F. Kulak and C. Fiala 106 (1988) 47
Variational approach to fluid-structure interaction with sloshing, W.K. Liu and R.A. Uras 106 (1988) 69
Reinforced flexural elements for TEMPSTRESS program, A.H. Marchertas, J.M. Kennedy and P.A. Pfeiffer 106 (1988) 87
Research and development studies on plant and core seismic behaviour for a fast reactor, A. Martelli, M. Forni, P. Masoni, G. Maresca, A. Castoldi and F. Muzzi 106 (1988) 103
Analysis of primary containment response using an arbitrary Lagrangian–Eulerian method, C.-Y. Wang 106 (1988) 127
A numerical algorithm for analyzing piping response to thermal transients and seismic excitations, C.-Y. Wang 106 (1988) 147
Analysis of the Chernobyl Reactor Accident (II): An examination of the improvement measures concerning the accident of the Chernobyl power plant, T. Wakabayashi, Y. Hayamizu and T. Kitahara 106 (1988) 163
Temperature increase on target due to jet impingement under BWR/PWR loss of coolant accident conditions, T. Isozaki and S. Miyazono 106 (1988) 257
Modelling of fuel rod behaviour and recent advances of the TRANSURANUS code, K. Lassmann and H. Blank 106 (1988) 291
Response of NPP structures to simultaneously acting air pressure loads and ground waves caused by a gas cloud explosion, H. Werkle and G. Waas 106 (1988) 345
Neutronic feasibility of an LMFBR super long-life core (SLLC), M. Kawashima, K. Aoki, K. Arie and Y. Tsuboi 106 (1988) 357
Probabilistic risk assessment: a look at the role of artificial intelligence, J. Wang, M. Modarres and R.N.M. Hunt 106 (1988) 375
More comprehensive approaches for determining risk sensitivities to component aging, W.E. Vesely 106 (1988) 389

Mechanical design, component fabrication and testing

Ductile fracture mechanics methodology for complex cracks in nuclear piping, A. Zahoor 106 (1988) 243
Estimation of the ductile unstable fracture of pipe with a circumferential surface crack subjected to bending, R. Kurihara, S. Ueda and D. Sturm 106 (1988) 265

Modelling of fuel rod behaviour and recent advances of the TRANSURANUS code, K. Lassmann and H. Blank 106 (1988) 291
ZB2-tests – Description of the intermediate size vessel and AE results, P. Knoch, H. Gertkemper and H.-J. Maier 106 (1988) 315
Results of acoustic emission during mechanical and thermal loadings of vessel components and their fracture mechanical interpretation, H. Gries and E. Waschkies 106 (1988) 399

Structural design, construction methods and testing

On site specific design response spectra, A.K. Gosh 106 (1988) 275

Information

Preface to the topical issue dedicated to Dr. Stanley H. Fistedis, T. Belytschko 106 (1988) ix

Nuclear safety

Examination of the destructive forces in the Chernobyl accident based on NSRR experiments, M. Sobajima and T. Fujishiro 106 (1988) 179
